

**STOP VIVA'S GAS TERMINAL
SUPPORT REAL CLIMATE ACTION**

CLIMATE ACTION LETITION

**Call for the development of a scientifically based
roadmap to a fully decarbonised society by 2035**

**Numbers count. So does advocacy, which is personal.
A 'letition' is a cross between a letter and a petition.
It is a method to get more people to mail more letters
to more parliamentarians. We need hundreds of letitions.**

**When more than 50 letters are mailed to local members
expressing our real concerns, it gives the MP strength to
approach the ministers most interested in urgent and real
climate action based on what the science says is needed.**

See how you become part of a letition on adacaust.com.au
